WELCOME FROM THE PRESIDENT OF THE CONGRESS

The European Federation of Organisations for Medical Physics (EFOMP) is currently representing a community of more than 6000 medical physicists in Europe (www.efomp.org). Every second year EFOMP is organizing together with a host national society of Medical Physics its Biennial Congress.

In 2007 the Xth EFOMP congress has been organized in conjunction with the Italian Association of Medical Physics (AIFM) in the beautiful international resort "Il Ciocco" in the vicinity of Pisa, Italy. The event is scheduled for mid-September, when the Tuscany climate is at its best for enjoying the landscape and the countryside of the Garfagnana hills and mountains.

The special goal for this congress is to present a state-of-the-art of Medical Physics in its various subspecialties: from Radiotherapy to Diagnostic Radiology, from Nuclear Medicine to Medical Imaging, from Radioprotection to Physiological Measurement Techniques. For this purpose top scientists in these fields will be invited to give overview talks. One of the main tasks of EFOMP is to promote and to harmonize the best practice of Medical Physics in Europe. Hence there will be special sessions on training and education in Medical Physics.

The vicinity with Pisa and its international airport will allow the participants to this event to take advantage of the many airplane connections worldwide, with numerous low-cost carriers. The monuments of Pisa certainly deserve a thorough visit. The Mediterranean Sea is only 10 km away from Pisa and a refreshing swim in its warm waters would suggest a longer staying than just for the three days of the meeting.

I am looking forward to welcome you at the EFOMP PISA 2007 Congress.

Alberto Del Guerra
President of the Congress

ACKNOWLEDGMENTS

I am very glad to acknowledge the support of the computer and secretarial staff of the Department of Physics of University of Pisa and of INFN, Sezione di Pisa. The EFOMP congress has been organized as part of the unique event that comprises AIFM and EFOMP meeting. Hence the EFOMP congress could not be held without the continuous support and the organization of Italian Association of Medical Physics (AIFM).

The scientific program has been put together with the help and expertise of the EFOMP officers and of all the members of the scientific committee. A particular thanks goes to dr. Giuseppina Bisogni and dr. Lucia Lilli, who have been instrumental in timely organizing this event.

Finally I would also like to acknowledge the official sponsorship of the following institutions and associations;

- University of Pisa
- Department of Physics, University of Pisa
- Faculty of Medicine, University of Pisa
- Istituto Nazionale di Fisica Nucleare (INFN)
- Frontiers Detectors for Frontiers Physics

**SECOND EUROPEAN CONFERENCE ON
MEDICAL PHYSICS AND ENGINEERING
110 YEARS AFTER THE DISCOVERY OF POLONIUM AND RADIUM**

Krakow, Poland, September 17-21, 2008

This Conference will coincide with the 14th Congress of the Polish Society of Medical Physics and the EFOMP Council and Officer's Meeting, so we expect our meeting to be an important event in European medical physics in the coming year 2008. Within the Second European Conference we will also organise a Workshop Radiation Protection of the Patient.

The conference will be held at the Faculty of Physics and Applied Computer Science of the AGH University of Science and Technology in Krakow, a leading Polish academic and research institution, also in the areas of medical physics and bio-engineering. We welcome you to Krakow most cordially and invite you to respond through our website <http://mpekrak08.ftj.agh.edu.pl> as soon as possible!

THE WORLD CONGRESS ON MEDICAL PHYSICS ON BIOMEDICAL ENGINEERING 2009

Organized as a common event of the IOMP, IFMBE, EFOMP and DGMP, the **World Congress on Medical Physics and Biomedical Engineering** will be held in **Munich, Germany, from September 7-12, 2009**. Taking place every three years, the World Congress is a major event where scientists can deepen their knowledge in their own field of expertise and also explore related areas.

Topics of the conference will cover all important area in medical physics as e.g. radiation oncology, diagnostic imaging, radiation protection and dosimetry, biological effects of ionizing and non-ionizing radiation, image processing, biosignal processing, modelling and simulation. Biomedical Engineering themes will be e.g. biomechanics, invasive Interventions, endoscopy and image guided therapy, diagnostic and therapeutic instrumentation, as well as micro and nanosystems in medicine, active implants, and biosensors. Sessions on education, training, accreditation and certification of physics and engineering professionals will complement the programme.

Located at the very heart of Europe, **Germany** has a long tradition of physics and engineering in medicine and medical technology devices. With its fascinating mix of history, culture, recreation and it's cosmopolitan flair, **Munich** makes an ideal choice for the World Congress 2009.

All relevant information on the congress can be found on the website <http://www.wc2009.org>. We look forward to seeing you there in Munich in 2009!
